

" The cooling system carries the most responsibility in your vehicle. Not only does it cool the engine, it also provides heat for the interior and cools your transmission. "

" Regular flushing of the system helps to maintain optimum vehicle operating temperature and is an essential fluid maintenance service. "

Cooling System Flush, Fill and Lubricant

*Install Wynn's X-Tend Radiator Flush
Install Wynn's X-Tend Stop Leak*

Add a chemical flush, change the fluid and add a cooling system water pump lubricant and stop leak to help prevent coolant loss.

Cooling System Flush, Fill, Treatment and Lubricant

*Install Wynn's X-Tend Radiator Flush
Install Wynn's X-Tend Radiator Treatment
Install Wynn's X-Tend Water Radiator Stop Leak*

Utilizing patented Wynn's cooling system equipment we will:

- *Remove over 95% of the contaminated coolant*

Proprietary flushing chemicals are added to the old coolant to:

- *Safely remove unwanted rust, scale & deposits*

Proprietary conditioning chemicals are added to the new coolant to:

- *Protect against rust and corrosion*
- *Improve heat transfer*
- *Prolong cooling system life expectancy*
- *Reduce electrolysis which cause scale build up*
- *Lubricate water pump*
- *Protect against minor component leaks*
