

# Fuel Emission

24,000 KM - 1 YEAR

Most vehicles

" Vehicles have changed significantly when it comes to the fuel system. Components are controlled by computers and computers rely on sensors to supply accurate information."

" Deposits in the fuel and air intake system can cause hard starting, stalling, rough idling, hesitation, knocking, loss of power, poor fuel economy and increased emissions. "

" Dirt, varnish build-up, corrosion and carbon deposits form in all fuel injected vehicles. "

## Minor Emission Service

Install Wynn's X-Tend Emission Control  
Install Wynn's X-Tend Valve Injector Cleaner

Clean the combustion chamber and remove moisture from the fuel system.

## Minor Emission Service & Intake Cleaning

Install Previous Kit  
Install Wynn's X-Tend Air Intake Cleaner

Clean the combustion chamber, remove fuel system moisture, clean varnish and carbon from the intake passages.

## Complete Air/Fuel Emission Service

Install Wynn's X-Tend Engine Tune-Up  
Install Wynn's X-Tend Emission Control  
Install Wynn's X-Tend Belgium Injection System Purge

Completely clean the entire fuel system:

- Fuel Lines
- Intake Valves
- Throttle Plate
- Fuel Injectors
- Combustion Chambers
- Throttle Body

Restore the fuel system to its original design for:

- Maximum Performance
- Smooth Idling
- Eliminate Knocking
- Easy Starting
- Increased Power
- Maximum Fuel Economy

The " BEST " Complete Fuel Injection Emission Service will help reduce your emissions
