

Power Steering 55,000 KM - 3 YEARS

Most Vehicles

"Your power steering is a hydraulic system consisting of seals and metal sleeves. All of which can be damaged by contaminated power steering fluid."

Rock and Pinion Steering System

Contaminated Fluid

Clean Fluid

"Contaminated fluid becomes abrasive and wears at the vital components. If neglected, the only fix is replacement of the power steering rack. This can be costly and prevented."

Power Steering Flush, Fluid Exchange and Conditioning

Install Wynn's X-Tend Power Steering Flush
Install Wynn's X-Tend Power Steering Conditioner

Utilizing Wynn's power steering flush equipment we will:

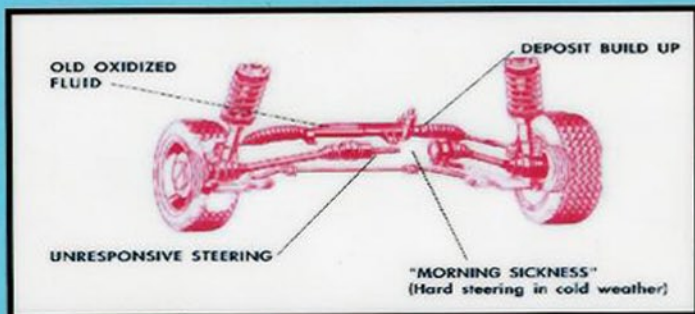

- ◆ Remove nearly 100% of contaminated fluid

Proprietary flushing chemicals are added to the old fluid to:

- ◆ Safely remove unwanted sludge and varnish deposits

Proprietary conditioning chemicals are added to the new fluid to:

- ◆ Help prevent sluggish steering on cold mornings
- ◆ Reduce or eliminate steering noise
- ◆ Provide proper lubrication of components
- ◆ Help avoid premature, unexpected and expensive power steering system failures
- ◆ Condition seals to help stop and prevent leaks
